Lagobo S.A.

Desarrollador Junior de Software

Building software that solves real-world problems is what drives me, and I have been following Lagobo S.A.'s recent projects with great interest. My background in full-stack development, combined with my hands-on experience in deploying production-ready applications, aligns perfectly with the technical challenges your team tackles daily. In my recent project, 'El Grano de Oro,' I integrated AI models like Gemini to create personalized recommendation engines and automated customer support, demonstrating my ability to bridge the gap between complex logic and user-centric interfaces. Beyond web development, I have built robust desktop tools using Java and JavaScript, ensuring seamless functionality and cross-platform compatibility. My technical toolkit, which includes Docker, SQL, and Git, allows me to contribute effectively to modern development workflows from day one. I am particularly drawn to Lagobo S.A. because of your commitment to innovation and high-quality engineering. I am confident that my proactive approach to learning and my experience in taking projects from concept to deployment will make me a valuable asset to your development team. I would welcome the opportunity to discuss how my skills in AI integration and full-stack development can support your upcoming initiatives. Are you available for a brief call next week to explore how I can contribute to your team?

Atentamente,

Jorge Jaime Sena
