PERFIL PROFESIONAL

AI Engineer and Full-Stack Developer with a strong focus on production-grade LLM applications. Experienced in building scalable AI agents, integrating LLM APIs, and optimizing system performance. Proficient in Python, cloud infrastructure, and CI/CD pipelines, with a proven track record of deploying real-world solutions that enhance user experience and operational efficiency.

EXPERIENCIA LABORAL

Software Developer & AI Engineer (Freelance)

Self-Employed | 2023 - Present

- Developed and deployed an AI-powered e-commerce platform using Gemini API, reducing customer support response time by 60% through automated virtual assistance.
- Engineered a custom recommendation engine for retail, increasing user engagement by 25% by optimizing latency-cost trade-offs in LLM inference calls.
- Implemented CI/CD pipelines using GitHub Actions for automated testing and deployment, reducing deployment time from 2 hours to 15 minutes.
- Built a desktop automation suite for media management, processing over 500+ daily requests with 99.9% uptime using Docker containerization.

FORMACIÓN

Higher Technician in Multiplatform Application Development

IES El Majuelo | 2025

Bachelor in Industrial Technologies Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

AI & Orchestration:

Python, LLM APIs (Gemini, OpenAI), Prompt Engineering, LangChain

Backend:

JavaScript, Java, C

Cloud & DevOps:

AWS, Docker, GitHub Actions, Vercel

Bases de datos:

SQL, Oracle

Languages:

English (C1), Spanish (Native), French (B1)

PROYECTOS RELEVANTES

El Grano de Oro (AI-Integrated SaaS)

Full-stack e-commerce platform with an AI assistant; optimized for 6 languages and automated email notifications using Python and Vercel.

Music Downloader Pro

Desktop application for automated library management; features cross-device synchronization via QR and optimized local data processing.
