GitLab Inc

Associate Solutions Architect (French or German fluency)

As a developer who thrives on building end-to-end solutions, I have long admired GitLab's role in shaping the modern DevSecOps landscape. My experience in deploying full-stack applications—such as my AI-integrated e-commerce platform—has given me a deep appreciation for the efficiency that CI/CD and cloud-native workflows bring to the development lifecycle. I am eager to bring this technical foundation to the Associate Solutions Architect role, where I can help SMB customers navigate their digital transformation journeys.

What excites me most about this opportunity is the chance to combine my passion for AI-driven productivity with a consultative approach. In my own projects, I have successfully integrated LLMs like Gemini to solve real-world problems, and I am ready to apply that same innovative mindset to help GitLab users maximize the platform's potential. My background in engineering, combined with my C1 English proficiency and ongoing French studies, ensures I can communicate complex technical concepts effectively to diverse stakeholders.

I am confident that my hands-on experience with Git, Docker, and cloud deployment, paired with my drive to continuously master new technologies, makes me a strong fit for your team. I would welcome the opportunity to discuss how my background in software architecture and my commitment to customer success can contribute to the growth of the EMEA Sales team. Thank you for your time and consideration.

Atentamente,

Jorge Jaime Sena
