Telemercado

Analista de Desarrollo Full Stack Junior

Building functional, user-centric software is what drives me every day. My experience spans from developing full-stack web applications like 'El Grano de Oro' to creating robust desktop tools, always focusing on clean code and efficient architecture. I am particularly drawn to this Junior Full Stack Developer role because it aligns perfectly with my technical background in JavaScript, Java, and SQL, and my passion for solving complex problems through technology. Throughout my projects, I have successfully integrated front-end interfaces with back-end databases and even implemented AI-driven features to enhance user experience. My ability to bridge the gap between design and data management, combined with my C1 English proficiency, allows me to contribute effectively to international teams from day one. I am eager to bring my proactive mindset and my hands-on experience with Docker and Git to your development team at Telemercado. I would welcome the opportunity to discuss how my technical skills and my drive for continuous learning can support your current projects. Are you available for a brief conversation next week to explore how I can add value to your team?

Atentamente,

Jorge Jaime Sena
