Julio Bellone y Asociados

Desarrollador Full Stack Jr / Jr+

Building software that solves real-world problems is what drives me, and I have followed the work at Julio Bellone y Asociados with great interest. My background in developing full-stack applications, combined with a hands-on approach to deployment, makes me a strong fit for your team. I have successfully launched projects like 'El Grano de Oro,' where I integrated AI-driven recommendations and automated workflows, demonstrating my ability to bridge the gap between complex backend logic and user-centric interfaces. My technical toolkit is built on a solid foundation of JavaScript, Java, and SQL, complemented by practical experience with Docker for containerization and Git for version control. Whether I am architecting a database or refining a frontend component, I prioritize clean code and scalability. I am particularly drawn to your company's commitment to innovation and would love to bring my proactive mindset to your upcoming projects. I am eager to discuss how my technical skills and passion for continuous learning can contribute to the success of your development team. Are you available for a brief conversation next week to explore how I can add value to your current initiatives?

Atentamente,

Jorge Jaime Sena
