PERFIL PROFESIONAL

Software Engineer with a strong foundation in JVM-based development and a passion for building scalable, high-performance systems. Specialized in full-stack development with a focus on backend architecture, API integration, and AI-driven solutions. Committed to writing clean, secure, and well-tested code for complex financial and transactional environments.

EXPERIENCIA LABORAL

Software Developer (Freelance / Personal Projects)

Independent Projects | 2023 - Present

- Architected and deployed a high-availability e-commerce platform using Spring Boot and PostgreSQL, handling concurrent user requests with optimized database queries.
- Integrated AI-driven recommendation engines and virtual assistants, improving user engagement metrics by 25% through personalized content delivery.
- Developed automated desktop tools for data synchronization, reducing manual processing time by 80% through efficient local-to-cloud data pipelines.

FORMACIÓN

Higher Technician in Multiplatform Application Development

IES El Majuelo | 2025 - Present

Bachelor's Degree in Industrial Technologies Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

Backend:

Java, Spring Boot, Kotlin (Fast learner), Microservices Architecture

Bases de datos:

PostgreSQL, Oracle, SQL

Cloud:

AWS (RDS, Lambda, SQS), Docker, Vercel

Languages:

Java, JavaScript, C, SQL

PROYECTOS RELEVANTES

El Grano de Oro

Full-stack e-commerce platform with AI integration, featuring secure payment flows and automated notification systems.

Music Downloader Pro

Desktop application for automated media management, utilizing efficient data handling and secure local network synchronization.
