PERFIL PROFESIONAL

Software Engineer with a strong focus on Data Infrastructure and Acquisition. Passionate about building scalable systems for unstructured data processing and AI integration. Proficient in Java, JavaScript, and cloud-native architectures, with a proven ability to deliver high-performance applications and automated data pipelines.

EXPERIENCIA LABORAL

Full Stack Developer & Systems Engineer (Freelance)

Independent Projects | 2022 - Present

- Architected and deployed a custom data acquisition system for e-commerce, processing real-time user interactions and reducing latency by 30% through optimized database queries.
- Developed automated data ingestion tools using Node.js and Python, handling multi-language content synchronization for international platforms.
- Integrated AI-driven recommendation engines, improving user engagement metrics by 25% through personalized data processing.

FORMACIÓN

Higher Technician in Multiplatform Application Development

IES El Majuelo | 2025 - Present

Bachelor in Industrial Technologies Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

Data Infrastructure:

Data Acquisition, ETL Pipelines, Automation, API Integration

Backend:

Java, JavaScript, Node.js, Python

Bases de datos:

SQL, Oracle, PostgreSQL

Cloud & DevOps:

Docker, Git, Vercel, AWS (Basic)

PROYECTOS RELEVANTES

El Grano de Oro (AI-Powered E-commerce)

Full-stack platform with an AI-driven assistant for personalized recommendations, featuring automated email notifications and multi-language support.

Music Downloader Pro

Desktop application for automated media library management and synchronization, utilizing local data processing and network protocols for cross-device connectivity.
