PERFIL PROFESIONAL

Full-Stack Software Engineer with a focus on Martech and data-driven applications. Passionate about building scalable web solutions using Next.js and TypeScript. Experienced in integrating AI models and optimizing performance, with a strong foundation in server-side tracking, data analytics, and bridging the gap between marketing requirements and technical implementation.

EXPERIENCIA LABORAL

Software Developer & Freelance Consultant

Self-Employed | 2023 - Present

- Developed and deployed full-stack web applications using Next.js, reducing page load times by 30% through optimized rendering and efficient script management.
- Implemented server-side tracking solutions and data integrations, ensuring 99% data accuracy in marketing attribution by debugging discrepancies using SQL and custom data pipelines.
- Integrated AI-driven features (Gemini API) into production environments, increasing user engagement by 25% through personalized recommendation algorithms.
- Automated marketing data workflows using custom scripts, reducing manual reporting time by 10 hours per week.

FORMACIÓN

Higher Technician in Multiplatform Application Development

IES El Majuelo | 2025 - Present

Bachelor of Industrial Technologies Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

Frontend & Web:

JavaScript, TypeScript, Next.js, HTML5, CSS3

Martech & Analytics:

Google Tag Manager (GTM), Server-side GTM, Meta CAPI, Google Enhanced Conversions, Segment, RudderStack

Backend & Data:

SQL, Java, Node.js, API Integration

Tools & Cloud:

Git, Docker, Vercel, Oracle

PROYECTOS RELEVANTES

El Grano de Oro (AI-Powered E-commerce)

Full-stack store built with Next.js, featuring AI-driven product recommendations and automated email notifications, deployed on Vercel.

Music Downloader Pro

Desktop application for automated music library management, utilizing advanced synchronization logic and local data processing.
