QUBIQ | Odoo Best Partner Europe

Desarrollador de Python Odoo

My passion for building scalable software and automating complex processes aligns perfectly with the technical challenges at QUBIQ. Having developed full-stack applications and integrated AI models into production environments, I am eager to apply my strong foundation in Python to the Odoo ecosystem. My experience in creating end-to-end solutions, from database management to user-facing interfaces, has prepared me to hit the ground running in a fast-paced environment like yours. I am particularly drawn to QUBIQ's reputation as a top Odoo partner and am excited about the prospect of contributing to high-impact ERP implementations. My background in engineering and my ability to learn new frameworks rapidly ensure that I can quickly master Odoo's architecture to deliver robust results. I am confident that my proactive approach to problem-solving and my technical versatility will be a valuable asset to your development team. I would welcome the opportunity to discuss how my skills in Python and my dedication to software excellence can support QUBIQ's upcoming projects. Please let me know when you might be available for a brief conversation.

Atentamente,

Jorge Jaime Sena
