Huspy

Frontend Engineer

Building high-performance web interfaces is what drives me, and my recent work on projects like 'El Grano de Oro' and 'Catering SanMor' reflects my commitment to clean, functional, and user-centric design. By leveraging JavaScript, HTML, and CSS, I have successfully deployed full-stack solutions that go beyond simple layouts, integrating AI-driven features and automated workflows that solve real-world business problems. My technical background, combined with a proactive approach to learning, allows me to adapt quickly to the fast-paced environment at Huspy. I am particularly drawn to your team's focus on innovation and excellence in the frontend space. I am confident that my ability to bridge the gap between complex logic and intuitive user experiences will make me a valuable asset to your engineering department. I would love to discuss how my hands-on experience with modern web technologies can contribute to the continued success of Huspy. Are you available for a brief conversation next week to explore how my skills align with your current frontend initiatives?

Atentamente,

Jorge Jaime Sena
