PERFIL PROFESIONAL

Software Developer with a strong focus on backend engineering and cloud automation. Proficient in Java and Python for scalable application development, with hands-on experience in AWS infrastructure and Terraform. Proven ability to deliver production-ready solutions autonomously in remote environments, leveraging AI integration to optimize performance.

EXPERIENCIA LABORAL

Software Developer (Freelance/Independent Projects)

Self-Employed | 2022 - Present

- Architected and deployed a full-stack e-commerce platform using cloud-native practices, achieving 99.9% uptime and integrating AI-driven recommendation engines.
- Automated software deployment pipelines and infrastructure provisioning using Docker and cloud services, reducing manual configuration time by 60%.
- Developed custom desktop and web tools using Java and Python, supporting multi-language environments and real-time data synchronization for end-users.

FORMACIÓN

Higher Technician in Multiplatform Application Development (DAM)

IES El Majuelo | 2025 - Present

Bachelor in Industrial Technologies Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

Backend:

Java, Python, Spring Boot

Cloud & DevOps:

AWS, Terraform, Docker, Git

Databases:

SQL, Oracle

Languages:

Spanish (Native), English (C1 - Cambridge)

PROYECTOS RELEVANTES

El Grano de Oro (AI-Powered E-commerce)

Full-stack store with AI-driven virtual assistant and automated email notifications, deployed on Vercel with cloud-integrated backend services.

Music Downloader Pro

Desktop application built for automated library management, featuring WiFi synchronization and cross-platform compatibility.
