Scotiabank

Junior Developer

Building software that solves real-world problems is what drives me, and I have followed Scotiabank's commitment to digital transformation with great interest. My background in full-stack development, combined with my hands-on experience integrating AI models like Gemini into production-ready applications, aligns perfectly with the innovative environment at your team. I thrive on creating end-to-end solutions, from intuitive user interfaces to robust database management, ensuring that every project I touch is both functional and scalable. Beyond my technical skills in JavaScript, Java, and SQL, I bring a proactive mindset and a C1 level of English, which allows me to collaborate effectively in international settings. My recent work on e-commerce platforms and automated desktop tools demonstrates my ability to take a project from concept to deployment independently. I am eager to bring this same level of dedication and technical curiosity to the Junior Developer role at Scotiabank. I would welcome the opportunity to discuss how my experience with AI integration and full-stack development can contribute to your upcoming projects. Are you available for a brief conversation next week to explore how I can add value to your team?

Atentamente,

Jorge Jaime Sena
