Infosys

Full Stack Developer

My passion for building end-to-end software solutions has led me to develop projects like 'El Grano de Oro', a full-stack e-commerce platform where I integrated AI assistants and automated workflows. Having a solid foundation in JavaScript, Java, and SQL, I thrive on transforming complex requirements into functional, user-centric applications. My technical background, combined with my experience in deploying real-world web and desktop tools, allows me to contribute effectively to your development team from day one. I am particularly drawn to Infosys because of your commitment to large-scale digital transformation and innovation. I am confident that my ability to bridge the gap between front-end interfaces and robust back-end databases, along with my proactive approach to problem-solving, aligns perfectly with the challenges your team tackles. I would welcome the opportunity to discuss how my technical skills and hands-on experience can support your upcoming projects. Please let me know when you might be available for a brief conversation to explore how I can contribute to your team.

Atentamente,

Jorge Jaime Sena
