New Way Solutions LLC

Full Stack Developer

Building robust software is more than just writing code; it is about creating seamless experiences that solve real-world problems. My journey as a developer has been defined by a hands-on approach, where I have successfully deployed full-stack applications like 'El Grano de Oro,' integrating AI-driven features with a solid foundation in JavaScript, Java, and SQL. I thrive on the challenge of bridging the gap between complex backend logic and intuitive user interfaces. My technical toolkit, which includes Docker for containerization and Oracle for database management, allows me to maintain high standards of efficiency and scalability in every project I undertake. I am particularly drawn to New Way Solutions LLC because of your commitment to innovative software architecture. I am confident that my ability to adapt quickly to new technologies and my proactive mindset will allow me to contribute effectively to your development team from day one. I would welcome the opportunity to discuss how my technical background and passion for building production-ready software align with the goals of your team. Are you available for a brief conversation next week to explore how I can add value to your upcoming projects?

Atentamente,

Jorge Jaime Sena
