Growmodo

WordPress Developer / AI Specialist

The opportunity to join Growmodo as a WordPress Developer and AI Specialist aligns perfectly with my background in building full-stack web solutions and my passion for integrating AI into development workflows. Having already deployed projects like 'El Grano de Oro,' where I implemented custom AI-driven chatbots and recommendation engines, I am eager to bring this same technical creativity to your team. My experience spans the entire development lifecycle, from architecting databases with MySQL to crafting responsive front-ends using JavaScript, HTML, and CSS.

I thrive on solving complex technical challenges and optimizing performance, whether it is through custom plugin development or streamlining processes with AI-powered tools. My academic background in Software Development and Industrial Engineering, combined with my hands-on experience in managing production-ready applications, has prepared me to take full ownership of the projects you manage. I am particularly drawn to Growmodo's commitment to innovation and its global, collaborative culture.

I am confident that my ability to deliver high-performance, secure, and scalable WordPress solutions will make a meaningful impact on your clients' success. I would welcome the chance to discuss how my technical skills and proactive problem-solving mindset can contribute to your team's continued growth. Are you available for a brief conversation next week to explore how I can support your upcoming projects?

Atentamente,

Jorge Jaime Sena
