Owen Thomas | B Corp™

Junior Full Stack Engineers | TypeScript | 4 Days Per Week LDN | D2C Start-Up |
£40K - £60K

Building scalable, production-ready applications is what drives me. My recent work on 'El Grano de Oro,' a D2C e-commerce platform featuring AI-driven recommendations and multi-language support, aligns perfectly with the mission at Owen Thomas. I have a strong foundation in full-stack development and am currently deepening my expertise in TypeScript to ensure type-safe, maintainable codebases that scale effectively. My approach combines technical rigor with a focus on user experience, as demonstrated by my ability to deploy functional, real-world solutions from scratch. Beyond the code, I thrive in environments that value autonomy and continuous learning. I am particularly drawn to your B Corp status and the opportunity to contribute to a mission-driven team while working in a high-growth startup setting. I am confident that my hands-on experience with web architecture and AI integration will allow me to hit the ground running and add immediate value to your engineering team. I would welcome the chance to discuss how my technical background and passion for building efficient digital products can support your upcoming projects. Are you available for a brief conversation next week to explore how I can contribute to your team?

Atentamente,

Jorge Jaime Sena
