BTG Pactual Chile

Desarrollo de Software

Building software that solves real-world problems is what drives me, and I have been following the innovative work at BTG Pactual with great interest. My background in full-stack development, combined with my hands-on experience in deploying production-ready applications, aligns perfectly with the technical challenges your team tackles daily. In my recent project, 'El Grano de Oro,' I integrated AI-driven recommendation engines and virtual assistants, demonstrating my ability to bridge the gap between complex backend logic and seamless user experiences. Beyond web development, I have built robust desktop tools using Java and JavaScript, always focusing on scalability and performance. My technical toolkit, which includes Docker, SQL, and Git, allows me to contribute effectively to agile development cycles from day one. I am particularly drawn to BTG Pactual's commitment to technological excellence and would love to bring my proactive, problem-solving mindset to your software development team. I am eager to discuss how my experience with AI integration and full-stack architecture can support your upcoming projects. Are you available for a brief conversation next week to explore how I can contribute to your team?

Atentamente,

Jorge Jaime Sena
