Options Consulting Solutions

Junior Full Stack Developer

Building software that solves real-world problems is what drives me every day. My experience spans from developing full-stack web applications like 'El Grano de Oro' to creating desktop tools, always focusing on clean code and functional architecture. I am particularly drawn to the Junior Full Stack Developer role at Options Consulting Solutions because of your commitment to innovative technical solutions, which aligns perfectly with my background in JavaScript, Java, and SQL.

Throughout my projects, I have leveraged Docker for containerization and Git for version control to ensure efficient deployment cycles. Beyond just writing code, I enjoy the challenge of integrating complex features, such as AI-driven assistants and automated workflows, into user-friendly interfaces. My technical foundation, combined with a proactive approach to learning, allows me to adapt quickly to new environments and contribute effectively to team goals from day one.

I am eager to bring my passion for full-stack development and my problem-solving mindset to your team. I would welcome the opportunity to discuss how my technical skills and recent projects can support the ongoing success of Options Consulting Solutions. Are you available for a brief conversation next week to explore how I can contribute to your upcoming projects?

Atentamente,

Jorge Jaime Sena
