Picture Production Company

Junior Full Stack Developer

Building functional, user-centric applications is what drives me every day. My experience spans the entire development lifecycle, from crafting responsive interfaces with HTML and CSS to architecting robust backends using JavaScript and SQL. I have successfully deployed real-world projects, such as an AI-integrated e-commerce platform, which allowed me to bridge the gap between complex logic and seamless user experience. My technical background is complemented by a proactive approach to problem-solving and a constant desire to optimize workflows. Whether I am managing databases or refining frontend components, I focus on writing clean, maintainable code that delivers tangible value. I am particularly drawn to Picture Production Company because of your commitment to high-quality digital solutions, and I am confident that my hands-on experience with full-stack development makes me a strong fit for your team. I would welcome the opportunity to discuss how my technical skills and passion for building software can contribute to your upcoming projects. Are you available for a brief conversation next week to explore how I can add value to your development team?

Atentamente,

Jorge Jaime Sena
