iO Associates

Fullstack Developer

Building software that solves real-world problems is what drives me every day. My experience spans from developing full-stack web applications like 'El Grano de Oro'—which features AI-driven recommendations and a custom chatbot—to creating robust desktop tools like Music Downloader Pro. I thrive on the challenge of bridging the gap between complex backend logic and intuitive user interfaces, ensuring that every project I deploy is both functional and scalable. My technical foundation in JavaScript, Java, and SQL, combined with my hands-on approach to integrating AI models, allows me to contribute effectively to dynamic development teams from day one. I am particularly drawn to the work at iO Associates because of your commitment to high-quality engineering standards. I am eager to bring my proactive mindset and my ability to learn new technologies rapidly to your team. I would welcome the opportunity to discuss how my background in full-stack development and my passion for automation can add immediate value to your current projects. Are you available for a brief conversation next week to explore how I can contribute to your team?

Atentamente,

Jorge Jaime Sena
