Binkobank

Junior Frontend Developer

Building functional and visually engaging web interfaces is what drives my daily development work. Having successfully deployed projects like 'El Grano de Oro' and 'Catering SanMor,' I have gained hands-on experience in transforming complex requirements into clean, responsive, and user-friendly web applications using JavaScript, HTML, and CSS. My approach goes beyond simple coding; I focus on creating seamless user experiences that solve real-world problems, whether through intuitive navigation or integrated AI features. I am particularly drawn to Binkobank's commitment to innovation and excellence in the fintech space. My background in both software development and industrial engineering has equipped me with a strong analytical mindset and the ability to adapt quickly to new technical challenges. I am confident that my technical proficiency and proactive attitude will allow me to contribute effectively to your frontend team from day one. I would welcome the opportunity to discuss how my skills in modern web development can support Binkobank's upcoming projects. Are you available for a brief conversation next week to explore how I can add value to your team?

Atentamente,

Jorge Jaime Sena
