Crossing Hurdles

Web Developer (HTML,CSS) | Remote

Building functional and visually appealing web experiences is what drives me. My recent work on projects like 'El Grano de Oro' and 'Catering SanMor' has allowed me to master the nuances of HTML and CSS, ensuring that every interface I build is not only responsive but also optimized for a seamless user experience. I thrive on turning design concepts into clean, maintainable code that performs reliably across all devices. Beyond just writing markup, I enjoy the challenge of structuring web layouts that prioritize both aesthetics and accessibility. My background in software development, combined with a proactive approach to problem-solving, ensures that I can contribute effectively to your team from day one. I am eager to bring my technical skills and my passion for web development to Crossing Hurdles. I would welcome the opportunity to discuss how my experience with modern web standards can support your current projects. Are you available for a brief conversation next week to explore how I can add value to your development team?

Atentamente,

Jorge Jaime Sena
