Invisible Geeks

JR Full Stack Developer

Building scalable web solutions is what drives me, and I have been following the innovative work at Invisible Geeks with great interest. My background in full-stack development, combined with a hands-on approach to deploying real-world applications, aligns perfectly with the challenges your team tackles daily. I am eager to bring my technical expertise to your upcoming projects.

In my recent work, I have leveraged JavaScript to build end-to-end applications, such as an e-commerce platform integrated with AI-driven recommendation engines and virtual assistants. Beyond the frontend, I am comfortable managing database architectures and backend logic, ensuring a seamless user experience. My experience with tools like Docker and Git allows me to integrate quickly into professional development workflows while maintaining high code quality.

I am particularly drawn to Invisible Geeks because of your commitment to pushing the boundaries of software development. I am confident that my ability to learn rapidly and my proactive problem-solving mindset will make me a valuable asset to your engineering team. I would welcome the opportunity to discuss how my skills can contribute to your current goals; are you available for a brief call next week?

Atentamente,

Jorge Jaime Sena
