Poynter Institute

Web Developer

Building functional, user-centric web applications is what drives me, and I have followed the Poynter Institute's commitment to digital excellence with great interest. My background in full-stack development, combined with a hands-on approach to solving real-world problems, makes me a strong candidate to contribute to your web development team. In my recent projects, such as 'El Grano de Oro,' I successfully integrated AI-driven recommendation systems and virtual assistants, demonstrating my ability to go beyond standard web interfaces to create dynamic, intelligent user experiences. I am proficient in JavaScript, SQL, and modern deployment workflows, and I thrive in environments that require both technical precision and creative problem-solving. My experience in developing scalable web solutions, from initial architecture to production deployment, aligns perfectly with the technical needs of your organization. I am eager to bring my proactive mindset and technical versatility to the Poynter Institute. I would welcome the opportunity to discuss how my skills in full-stack development and AI integration can support your upcoming digital initiatives. Are you available for a brief conversation next week to explore how I can add value to your team?

Atentamente,

Jorge Jaime Sena
