PERFIL PROFESIONAL

Software Engineer with a strong foundation in full-stack development and AI integration. Passionate about building scalable, reliable systems using Python, Django, and AWS. Proven ability to own technical implementations from architecture to deployment, with a focus on observability and CI/CD automation.

EXPERIENCIA LABORAL

Software Engineer (Freelance / Personal Projects)

Independent Developer | 2022 - Present

- Architected and deployed a scalable e-commerce platform using serverless AWS infrastructure, reducing hosting costs by 40% compared to traditional VPS.
- Implemented automated CI/CD pipelines using GitHub Actions, reducing deployment time from 2 hours to 15 minutes.
- Integrated AI-driven recommendation engines and chatbots, increasing user engagement metrics by 25% on production web applications.
- Mentored junior peers in best practices for Git version control and modular code architecture, improving team code quality and velocity.

FORMACIÓN

Higher Technician in Multiplatform Application Development

IES El Majuelo | 2025 - Present

Bachelor in Industrial Technology Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

Backend:

Python, Django, JavaScript, Java

Frontend:

React, HTML5, CSS3

Bases de datos:

PostgreSQL, MySQL

Cloud & DevOps:

AWS (Lambda, S3, EC2), Docker, CI/CD, Datadog

Languages:

Spanish (Native), English (C1 - Cambridge)

PROYECTOS RELEVANTES

El Grano de Oro (AI-Powered E-commerce)

Full-stack store with AI virtual assistant, deployed on AWS with automated CI/CD and integrated monitoring for performance tracking.

Music Downloader Pro

Desktop application for automated media management, featuring cross-device synchronization and robust error handling for high-volume data processing.
