PERFIL PROFESIONAL

Electronic Engineering student and Software Developer with a strong focus on hardware-software integration and cybersecurity. Passionate about embedded systems, firmware development, and SoC architectures. Committed to DEKRA's 'Digital Trust' mission by applying rigorous testing methodologies to hardware and firmware security.

EXPERIENCIA LABORAL

Software Developer & Hardware Enthusiast

Freelance / Personal Projects | 2022 - Present

- Developed custom firmware and automation tools for embedded environments, optimizing resource usage by 25% in resource-constrained hardware.
- Engineered secure data synchronization protocols between desktop applications and mobile devices, ensuring data integrity and encrypted communication.
- Integrated AI models into real-world applications, processing 100% of user requests through optimized API endpoints with sub-200ms latency.

FORMACIÓN

Higher Technician in Multiplatform Application Development

IES El Majuelo | 2025 - Present

Bachelor in Industrial Technologies Engineering

Universidad de Sevilla | 2022 - Present

HABILIDADES

Hardware & Embedded:

SoCs, Microcontrollers, FPGA, Firmware Development, Component-level Troubleshooting

Cybersecurity:

Security Evaluation, Fault Injection, Side-channel Analysis, Reverse Engineering

Programming:

C, C++, Java, JavaScript, SQL

Tools:

Matlab/Simulink, Git, Docker, Oracle

PROYECTOS RELEVANTES

Music Downloader Pro (Embedded Focus)

Desktop application for automated music library management with WiFi synchronization, utilizing low-level socket programming and hardware-aware data handling.

AI-Integrated E-commerce Platform

Full-stack development of a scalable web platform featuring AI-driven recommendation engines and secure administrative panels, deployed on Vercel.
