Telemercado

Analista de Desarrollo Full Stack Junior

Building functional, user-centric applications is what drives me, and I have been following Telemercado's work in digital transformation with great interest. My background combines a strong foundation in Java and JavaScript with a hands-on approach to full-stack development, which I believe aligns perfectly with the needs of your development team. In my recent projects, such as an AI-integrated e-commerce platform, I have managed the entire lifecycle—from crafting responsive interfaces using HTML and CSS to architecting robust backend logic and SQL database structures. I thrive on solving complex technical challenges, whether it is optimizing data flow or integrating new features that enhance user experience. Beyond my technical skills, my experience in building and deploying production-ready software has taught me how to work independently while maintaining high standards for code quality. I am eager to bring this proactive mindset to Telemercado and contribute to your ongoing projects. I would welcome the opportunity to discuss how my technical background and passion for software engineering can support your team's goals. Are you available for a brief conversation next week to explore how I can add value to your current initiatives?

Atentamente,

Jorge Jaime Sena
