Caja Rural de Aragón

Desarrollador/a Fullstack Junior | Zaragoza | Caja Rural de Aragón

Building robust software is more than just writing code; it is about solving real-world problems through clean architecture and efficient logic. My background in both Industrial Engineering and Software Development has provided me with a unique analytical perspective that I am eager to apply to the digital transformation initiatives at Caja Rural de Aragón. Having developed full-stack applications from scratch, I am comfortable navigating the entire lifecycle of a project, from designing intuitive front-end interfaces to managing complex back-end databases. My technical toolkit, centered on JavaScript, Java, and SQL, has allowed me to deploy functional solutions like my AI-integrated e-commerce platform, which handles everything from user recommendations to automated administrative workflows. I thrive in environments that demand continuous learning and technical precision. I am particularly drawn to the opportunity of contributing to the financial technology sector, where security and reliability are paramount. I am confident that my proactive approach to development and my ability to integrate modern technologies will allow me to add immediate value to your team. I would welcome the chance to discuss how my technical skills and passion for building scalable software align with the goals of Caja Rural de Aragón. Are you available for a brief conversation next week to explore how I can contribute to your upcoming projects?

Atentamente,

Jorge Jaime Sena
