adesso SE

Full-stack Developer

Building software that bridges the gap between complex logic and user-friendly interfaces is what drives me. My experience spans from developing full-stack web applications like 'El Grano de Oro'—which integrates AI-driven recommendations—to creating robust desktop tools using Java and JavaScript. I thrive on solving technical challenges, whether it is optimizing database queries with SQL or ensuring a seamless responsive design with HTML and CSS. My background in Industrial Engineering, combined with my current studies in Multiplatform Application Development, has instilled in me a disciplined approach to problem-solving and a deep appreciation for scalable architecture. I am particularly drawn to adesso SE because of your reputation for delivering high-quality, innovative digital solutions. I am confident that my ability to learn quickly and my hands-on experience with the full development lifecycle will allow me to contribute effectively to your team from day one. I would welcome the opportunity to discuss how my technical skills and passion for building production-ready software align with the goals of your development team. Are you available for a brief conversation next week to explore how I can add value to your upcoming projects?

Atentamente,

Jorge Jaime Sena
