Banco Hipotecario

Desarrollador Java JR (Quarkus)

Building high-performance applications is what drives me, and I have been sharpening my Java skills to tackle complex backend challenges. My background in developing full-stack projects, combined with a strong foundation in software architecture, makes me a perfect fit for your Java Developer role at Banco Hipotecario. I am particularly drawn to your focus on Quarkus, as I am eager to leverage its efficiency and speed to build scalable, cloud-native solutions that meet modern banking standards. Beyond my technical proficiency in Java, I bring a proactive mindset and a proven track record of deploying real-world applications, such as my AI-integrated e-commerce platform. My ability to learn independently and adapt to new frameworks quickly ensures that I can contribute to your team's success from day one. I am confident that my technical curiosity and commitment to clean, efficient code align perfectly with the high standards of your development team. I would welcome the opportunity to discuss how my background in Java and my passion for backend optimization can support the ongoing projects at Banco Hipotecario. Are you available for a brief conversation next week to explore how I can contribute to your team?

Atentamente,

Jorge Jaime Sena
