Florza Resourcing

Junior Developer

Building software that solves real-world problems is what drives me, and I have been following Florza Resourcing's commitment to innovation with great interest. My background in full-stack development, combined with my hands-on experience in deploying production-ready applications, makes me a strong candidate for your Junior Developer opening. I thrive on turning complex requirements into functional, user-centric solutions, whether it is a web platform or a desktop utility. In my recent project, 'El Grano de Oro', I integrated AI-driven recommendation engines and virtual assistants using Gemini, demonstrating my ability to implement cutting-edge technology into practical business tools. Beyond my technical skills in JavaScript, Java, and SQL, I bring a proactive mindset and the ability to adapt quickly to new environments. My academic foundation in Industrial Engineering and Software Development has taught me to approach coding with both analytical rigor and creative problem-solving. I am eager to bring this same energy to your team and contribute to the high-quality standards at Florza Resourcing. I would welcome the opportunity to discuss how my technical background and passion for automation can support your current projects. Are you available for a brief conversation next week to explore how I can add value to your development team?

Atentamente,

Jorge Jaime Sena
