Takt

Web Developer

Building functional, high-impact web applications is what drives me. My recent work on 'El Grano de Oro' allowed me to leverage JavaScript, HTML, and CSS to create a fully responsive e-commerce platform integrated with AI, proving that I can bridge the gap between complex technical requirements and seamless user experiences. I thrive on turning clean code into production-ready solutions that solve real-world business problems.

Beyond my technical foundation, I am deeply committed to continuous learning and independent problem-solving. Whether I am architecting a corporate site like 'Catering SanMor' or optimizing desktop tools, I focus on writing maintainable code and ensuring high performance. My background in Industrial Engineering and current studies in Multiplatform Application Development provide me with a unique analytical perspective that I am eager to apply to the projects at Takt.

I am confident that my hands-on experience with modern web technologies and my proactive approach to development make me a strong fit for your team. I would welcome the opportunity to discuss how my skills can contribute to the continued success of Takt. Are you available for a brief conversation next week to explore how I can add value to your current web initiatives?

Atentamente,

Jorge Jaime Sena
