Tate Recruitment

Junior Developer

Building software that solves real-world problems is what drives me. My journey as a developer has been defined by taking projects from concept to production, such as my e-commerce platform for 'El Grano de Oro,' where I integrated AI-driven recommendations and a custom virtual assistant. I thrive on the challenge of full-stack development, leveraging JavaScript, Java, and SQL to create seamless user experiences, while utilizing Docker to ensure efficient deployment environments. My background in Industrial Engineering, combined with my current studies in Multiplatform Application Development, has instilled in me a rigorous approach to problem-solving and technical architecture. I am particularly drawn to the opportunity at Tate Recruitment because of your commitment to innovation and high-quality software solutions. I am confident that my hands-on experience with AI integration and my ability to build robust desktop and web applications will allow me to contribute effectively to your development team from day one. I would welcome the chance to discuss how my technical skills and proactive mindset align with the goals of your team. Are you available for a brief conversation next week to explore how I can add value to your upcoming projects?

Atentamente,

Jorge Jaime Sena
