iO Associates

Fullstack Developer

Building software that bridges the gap between complex logic and user-friendly interfaces is what drives me every day. My experience developing full-stack projects, such as 'El Grano de Oro,' has allowed me to master the end-to-end lifecycle of web applications, from database management to integrating advanced AI features like Gemini for personalized user experiences. I thrive on solving technical challenges independently and turning ideas into production-ready solutions. Beyond web development, my background in Java and C, combined with my current studies in Multiplatform Application Development, has provided me with a solid foundation to adapt quickly to diverse tech stacks. I am particularly drawn to iO Associates because of your reputation for delivering high-impact digital solutions, and I am eager to bring my proactive mindset and technical versatility to your development team. I am confident that my ability to build scalable, functional applications will make me a valuable asset to your upcoming projects. I would welcome the opportunity to discuss how my skills in JavaScript, SQL, and AI integration align with your current needs. Are you available for a brief conversation next week to explore how I can contribute to your team?

Atentamente,

Jorge Jaime Sena
